Friday, June 17—
Boer War Opens.
Iowa Building Dedicated.

Saturday, June 18—
Philippine Encampment Dedication.

SIAM DEDICATION.

The dedication of the Temple-like building erected by the Siamese Commission takes place to-day at 10 o’clock.
The exercises are extremely simple, merely the delivery of the building by the Commission to President Francis on behalf of the government. A number of invitations have been issued for the function, following which the doors will be open to the public. Thereafter the public may visit the building daily between the hours of 10 a. m. to 4 p. m.

The Pavilion of Siam.
The Pavilion of Siam is a reproduction of the Wat, or Temple, Benchama Bopit, now building in Bangkok. All of the plans were made by the Bureau of Public Works of Siam, but because of the difference in the materials used as well as on account of a few minor changes in the dimensions, the working drawings were prepared in Washington, D. C., where also the building was framed. The sculptural figures and ornaments were made from designs sent from Siam.
In the Bangkok Temple the entire inner surface is ornamented. This was not possible here, owing to the lack of time, so the artist found it neces-
sary to adapt the Siamese units to the conditions that presented themselves and at the same time maintain the national art characteristics.

The display in the Pavilion has been taken chiefly from the Royal Museum of Bangkok and is intended to show the art forms and technical skill of the Siamese of a century ago as well as of the present time. There is on exhibition a large collection of ancient weapons, musical instruments and models of temples and houses of the country people. These, together with the photographs on the walls and the transparencies in the windows, give a very good idea of the scenery, life and activities of the country.

Of special interest are the portraits of His Majesty, The King, Her Majesty, The Queen and of His Royal Highness, The Crown Prince, who visited St. Louis in 1902 and took such a deep interest in the Exposition that he urged this participation on the part of Siam, becoming the President of the Royal Commission.

Following is the personnel of the Siamese Commission: His Royal Highness, The Crown Prince of Siam, President; A. Cecil Carter, Secretary-General, Ministry of Agriculture, Bangkok, Siam; James H. Gore, Commissioner General, Pavilion of Siam, St. Louis, Mo.

Iowa Day Features.

The celebration of Iowa Day on Friday, June 17, is receiving the attention of the State Commission. A majority of the members are present assisting in the preparations for the exercises.

The B. F. Mentzer Hose Company, of Marion, Iowa, consisting of a drill team of 30 men will act as an escort to the official party on Iowa Day. In addition to this Iowa organization, the Iowa State Cadets and the cadets of Simpson College, of Indianola, will give the state a representative display in the parade which is to be part of the celebration. The B. F. Mentzer Hose Company drill team is one of the best known organizations of the kind in the country, having won many prizes in competitive drills.

Indian School Items.

A class of sixteen Indian girls can be seen daily at the Indian School from 9:30 to 11:30 o'clock a.m. busily engaged in demonstrating Domestic Science as taught at Haskell. The course includes the selection of the complete furnishing of a kitchen, the care and preparation of vegetables for the table, plain and fancy cooking, including the baking of bread, meats, cakes, pastry, preserving and canning of fruits and preparing cereals. A model dining room and a complete laundry in which the best methods for washing all kinds of clothing, the preparation, starching and ironing are practically demonstrated.

The exhibit of the Presbyterian Mission Training School, of Sitka, Alaska, is installed in the Alaskan Building. The exhibit shows the work of the boys and girls in sewing, basket and bead-work, eobbling, carpentering, inlaid wood-work, cabinet making, boat building and work along educational lines, as taught in the school.

A tiny speck of gold is given to visitors to the Utah Gold Mill in the Gulch. The Utah Gold Mill is not a concession and admission is entirely free. The mill will be in operation in a few days.

U. S. Marines.

Two companies of U. S. Marines are in Camp Haywood, east of the Liberal Arts Palace, where they form an exhibit of the U. S. Government, showing camp life, hospital drills and tactics. The men are just returned from the Philippines. Organization:

Following is the camp routine, which will be by bugle call:

7:30 a.m. First Call for Reveille.
7:30 a.m. Assembly for Drill (and Reveille at Drill Call).

6:00 a.m. Physical Drill and Bayonet Exercise.

8:00 a.m. Colors.

8:15 a.m. Recall from Police.

8:40 a.m. First Call for Troop and Drill.

8:50 a.m. Troop, followed by Drill.

Troop Drill varies. Skirmish, Battalion Drill, occurring on the Plaza of St. Louis from 8 to 10 a.m. Parade occurs daily, alternating on the Plaza of Orleans and the Plaza of St. Louis, from 4 to 5 o'clock.

Vatican Treasures.

Francesco Caglioni, Special Commissioner from the Vatican, is in charge of the Vatican World's Fair exhibit. The Vatican exhibit, located in the Anthropology Building, is part of the exhibit in the Department of History.

The soloist for the next orchestral concert at Festival Hall, Friday, June 17, at 4:30 p. m., is the famous Portuguese operatic baritone, Don Francisco de Souza Continho, son of the Marquisde Borbe, the Chamberlain of the King of Portugal and chief officer of the Royal house. The Marquis married the Marchioness de Valenca of the royal blood of Brazanza, whose ancestry is said to be of the noblest and most ancient, dating from the 12th century. Don Francisco, who completed his studies under Campanini and other great masters, has sung at the Royal Opera House in Lisbon, at the courts of Berlin, Madrid and other European capitals. At Festival Hall next Friday Mr. de Souza will sing the prologue of Leon Cavallo's opera "Pagliacci" and the "Parisiana" from "Rigoletto."

A Kickapoo Bark hut is a feature of the Indian exhibit. The hut is 12 by 15 feet, built in a circular shape, with sides and top made of slabs of bark 3 feet long and a foot wide, which is woven into the pole framework of the building, and tied with thongs and rope. The Kickapoo tribe will occupy the hut, practicing their arts, basket weaving and bead work.

A Fishery exhibit is being installed in the Alaskan Building. The exhibit will include native boats, (Kyaks) spears, harpoons, lines, nets and curios of the salmon fisheries. Salmon cooked in various styles will be served to visitors.

Georgia will dedicate the building erected to represent that state on June 21.

Cuba's pavilion will be dedicated during the last week of June.
Mining Gulch.

Following is the location of the several attractions in the Mining Gulch southeast of the Palaces of Mine and Metallurgy. On the east side proceeding southward:

Model pottery, manufacturing pottery of all kinds from the clay, showing washing processes, moulding, decorating and firing.

Model well-drilling outfit, in operation showing methods of sinking oil and artesian wells.

Model mining pump plant, showing hydraulic pumps, low and high pressure, operated by both steam and electricity. A turbine-hydraulic pump throws a stream of water, 450 gallons per minute, under pressure of 250 pounds per square inch against bank to show how bills are cut down in placer mining.

New Mexico's turquoise mines, with miners in native garb working the mine. The gems are shown in process from the bank through the polishing machinery to the market. Turquoise bearing rocks are shown in abundance.

Model of the mammoth Crystal Cave of the Black Hills.

Mine ventilating fan with a capacity of 75,000 cubic feet of fresh air per minute in operation, showing how fresh air is introduced to deep mines.

Pennsylvania anthracite mine exhibit, where visitors may inspect every detail in anthracite coal mining.

Primitive copper mine, showing method of Mexicans before the Spanish Invasion. This miniature mine is operated by natives, who practice secret processes.

Arizona montana, shown in every detail, including the Arizona Gold Belt Railroad, operated by electricity, showing actual conditions from the "find" of the lucky prospector until the mine has become fully developed.

Ponds, showing the recovery of the mineral products of the state, shows the mineral resources of Tennessee.

Complete lead and zinc mine, represents one of Missouri's greatest sources of wealth.

A concentrating mill shows how ores are cleaned, crushed and separated.

California shows both the wet and dry methods of gold mining and stamping, with a cyanide reduction plant in operation.

Tramway, such as is used in mines for the carrying of ores through tunnels.

A large exhibit of pump and drills for prospecting for minerals, oil and gas, and for sinking artesian wells.

Complete gold reduction plant, consisting of a five-stamp mill, amalgamation plates, cyanide plant and concentrating tables operated eight hours a day. Fifteen hundred tons of Black Hills ore, shipped to World's Fair for the purpose, fully illustrates the most modern practice.

Patent Office Exhibit.

The Interior Department has a section in the Government Building devoted to the patent office with purpose to illustrate the function of the Government for protection of Inventors and for the promotion of progress in science and arts. The work of the patent office is illustrated by a few actual operating inventions which show remarkable Ingenuity, striking examples of the application of scientific principles to useful commercial purposes, as follows:

**Color Printing.**—Invention for imitating colors of nature in printing by "mixing" colors, superposing one transparent color upon another, crimson, red, yellow or blue, in separate impressions. Specimens free.

**Color Photography.**—Ives Kromskops.—Invention for reproduction of colors of nature in photography by means of separate color-negatives, of the object. By these separate color-negatives are recombined with startling realism by the Kromskops, which are freely available to visitors.

**Wireless Telegraph.**—Invention to enable messages to be transmitted between stations by telegraph without the use of wires, fully illustrated by instruments on view. The messages pass through the walls of the building from the patent office space to other points of the grounds. An accepted theory of wireless telegraph states that the surging electric charges between the spark gap causes the current to flow up the sending mast in the form of vortex rings in the hypothetical ether filling all space, and that these rings expand in all directions, reaching the distant station without wires and in a greatly attenuated condition. At the receiving station, the aerial receiving conductor constitutes an obstruction to a portion of the vortex ring, or ether wave, and therefore the latter, in part, follows down the mast, passes through the receiving instrument and causes a signal to be sounded.

**Fonalon's Telegraphs.**—This invention enables one to record sound waves on a steel wire by talking through a distant telephone. The wire may be sent by mail and is recorded and reproduced at any subsequent time.

**How It Is Done.**—The traveling steel band contacts with the recording magnet which is in circuit with the transmitting telephone. Each sound wave uttered at the transmitter causes a current to travel the length of the magnet, and the latter to locally magnetize the steel band. The magnetized portions of the band correspond accurately with the sound waves both in frequency and intensity. Therefore, when these magnetized portions are carried past the poles of the recording magnets in circuit with telephone receivers, currents corresponding with these magnetized portions, and therefore with the original sound waves, are generated in the receiver circuits by induction. These induced currents, of course, reproduce the original speech, in each separate telephone receiver.

In all cases the original record may be obliterated, and the wire or band used over again by passing the magnetized wire between the poles of a strong obliterating magnet.

The reproduction of portions of the original speech may be obtained from the same record, and since the only connection between the record and reproducer is an inductive one, no foreign sounds are generated, and therefore the clearness of the reproduction is astonishing.

The public may freely use these machines under the direction of the attendant, and any proper questions will be cheerfully answered.

**Irish Industrial Village**, 25 cents, 15 cents. Industrial exhibit. Blarney Castle, Booths and Bazaar. Theater, 2:00, 4:00, 7:45 and 9:15 p. m. Relics of famous Irishmen.

**Spanish Theater at Streets of Seville**, 25 cents. Spanish dancing. Every half hour.

**Habenbeck's Zoological Paradise and Animal Circus**, 25 cents. Circus every half hour, 25 and 50 cents; 10:30 a. m. to 10:30 p. m.

**Statistium**. Moving objects, illustrating economic conditions in the world, 10 cents.

**Moorish Palace**. Scenic tableau, historic views, poetic subjects, 25 cents. 15 cents.

**Hunting in the Ozarks**, shooting gallery. Seven shots, 20 cents.

**Japanese Village**, Garden and Theater every hour in the evening, 25 cents, 15 cents. Tea house, 10 cents; Sanpan, 10c; Jinrickshas, 10 cents.

**Ostrich Farm**, admission 10 cents, from South Pasadena, California; 30 ostriches. Black demon racing ostrich. Ostrich plumes on sale.

**Hereafter**. Glimpses of Paradise and Purgatory. Communion with the departed; an illusion, 25 cents.

**Palais du Costume**, 25 cents, 15 cents. Historic tableaux. Light vaudeville entertainment; vocal; instrumental. Afternoon, 3:30, 4:30; evening, 8:00, 9:00 and 10:00 o'clock.

**Creation**, 50 cents, 25 cents. Aquarama; moving platform; panorama of creation of the world; lecture on creation every hour, under the blue dome. Grottos with scenic illusions.

**Cummings' Wild West**, 50 and 25 cents; American Indian tribes; realistic scenes of life on the plains; Indians at work and play: Noted Indian Chiefs; Lacross game between Iroquios and Ojibways; every 1½ hours until 11:00 p. m.

**Russian Theater**, native dances and songs; 50 performers, 25 cents, 15 cents; free entrance from Theater to Village.

**Siberian Railway**, panoramic trip to Port Arthur; trains every half hour; fare 25 cents, 15 cents. Free entrance to Russian Village.

**Russian Village** to open June 15; admission 10 cents.

**Chinese Village**, open June 16; 25 cents, 10 cents; theater, 25 cents; Chinese drama every half hour; Joss House 10 cents; curio booths; Chinese restaurant; tea house; roof garden; Chinese kitchen.

**Constantinople**, free booths; theater, 25 cents; dancing girls.

**Cairo**, 10 cents; theater 25 cents; dances; camel rides 20 cents; donkey rides 10 cents.

**Deep Sea Diving**, 15 cents, 10 cents; realistic display of life of the diver every half hour.

**Esquimaux Village**, Alaska natives of Arctic Coast, 25 cents, 15 cents; reindeer and dog trains 10 cents; ice floes; huts; games and pastimes.
Baby Incubators, 25 cents; scientific exhibit of mechanical device for saving life; nurses and physicians in attendance; the famous speller, Col. Donaldson on duty.

Cliff Dwellers; open all day, 25 cents. Genuine Indians from the painted district in Snake dances; theater, 25 cents; curios and native homes and customs illustrated; lecturers in attendance. King of the Midway in charge.

Old Plantation, 15 cents; genuine scenes in the cotton fields; negro songs and dances every half hour.

L. A. Thompson’s Scenic Railway; fare 10 cents; longest and finest in the world; a ride of three miles; panoramas en route; two different routes.

Naval Show, 22 cents, 15 cents; realistic display of naval warfare by actual ships in engagement; performances at 4, 6, 8 and 10 o’clock; Saturdays 4, 6, 8, 9, 10 and 11 o’clock.

Hale’s Fire Fighters, 25 cents; a real fire in Greater New York; life of the fire laddies; midnight rescue; 3, 8 and 9:30 daily; Saturdays 2, 4, 8 and 9:30 o’clock.

Jim Key, 15 cents and 10 cents; educated horse in continuous exhibitions of Intelligence and comprehension.

Battle Abbey, 25 cents and 15 cents; scenic representation of great battles of American history by panorama; continuous until 11 p. m.

Galveston Flood, 25 cents and 15 cents; view of Galveston and the awful tidal destruction with scenic and electric effects; continuous.

New York to the North Pole, 25 cents and 15 cents; Ice bound in the Arctics; Aurora Borealis; Land of the Midnight Sun; wonderful sunlight effects; continuous.

Old St. Louis, 25 cents and 15 cents; arena with realistic scenes of life in old St. Louis; original settlers; cabins; every hour all day.

Under and Over the Sea, 50 cents; a trip to Paris in a submarine boat and return in an air ship; every half hour.

Glass Weavers, 25 and 15 cents.

Miniature Railway, fare 10 cents.

Launches, 50 and 25 cents.

Colorado Gold Mine, 10 cents.

Poultry Farm, 25 and 15 cents.

Lincoln’s Log Cabin, 15 and 10 cents.

Old Virginia Homestead, 25 cents.

Old Cahokia Homestead, 25 cents.

Temple of Mirth, 10 cents.

Coal Mine in the Gulch, 25 and 10 cents.

Grant’s Log Cabin, 10 cents.

Observation Wheel, 50 cents.

ILLUMINATION HOUR.

The Exposition rule is to illuminate the grounds and buildings daily at dusk and continue the illumination until 10 p.m. and 11 p.m. on Saturdays. The Cascades are operated at 11 a.m., 2 p.m., 3 p.m., 5 p.m. and 8 p.m. Illumination of Cascades 8:30 to 10:00 p.m. daily.

The Weather Bureau Station, U. S. Government Building, has supplied the following data as to the exact hour for dusk:
June 16, 7:27 p.m.
June 17, 7:28 p.m.

Nebraska Biograph Exhibit.

The Biograph Theater in Nebraska's exhibit in the Palace of Agriculture. Every half hour entertainments are given.
10:00 a.m. General farming scenes.
10:30 a.m. Cattle scenes.
11:00 a.m. Range scenes.
2:00 p.m. General farming scenes.
2:30 p.m. Cattle scenes.
3:00 p.m. Range scenes.
3:30 p.m. Beet sugar farming scenes.
4:00 p.m. Dairy scenes.
4:30 p.m. Orchard scenes.
5:00 p.m. Nebraska as seen from a railroad train.
